Laparoscopic Bariatric and Metabolic Surgery Course

Course Dates
23rd Jan - 25th Jan
15th June - 17th June

Course Outline

Bariatric surgery has evolved over the last four decades from open to minimal access techniques.

Minimal access techniques and early recovery have made a revolution in the acceptance of Bariatric surgery for treatment of morbid obesity and related diseases, mainly because of safety and faster recovery.

Diabetes has been a pandemic and Asians, especially Indians, are affected more with diabetes, obesity and metabolic syndrome, a joint burden responsible for increased morbidity and mortality. Metabolic surgery for diabetes is emerging as a new therapy. Bariatric surgery should be a part of training for each laparoscopic surgeon and gastroenterologist, since it involves entero-anastomosis and surgery of the Gastrointestinal tract.

ceMAST is the first of its kind to offer a comprehensive training and certification course for all interested in adding Bariatric surgery as a facet to their skills and practice.

Course Objectives

The participant should be able to :

- Diagnose obesity, morbid obesity, related problems, and choose a candidate for surgery
- Select a surgery type
- Know all the steps of a bariatric procedure in a standardized format
- Know how to diagnose and treat complications
- Manage nutritional challenges

Who Should Attend ?

- Laparoscopic surgeons already doing advanced procedures
- Surgeons who wish to learn laparoscopic anastomosis technology
- Upper GI Surgeons
- Surgical Gastroenterologists who wish to add Bariatric surgery as a facet to their career
- It is also a unique opportunity for young laparoscopic surgeons regularly doing advanced surgeries to learn everything about Bariatric procedures under one roof
- Surgeons who have performed few Bariatric procedures, but wish to upgrade and set-up their own Bariatric unit

Course Highlights

- Complete overview about bariatrics
- Videos - learning of all bariatric procedures
- Extensive hands-on experience of all anastomosis and bariatric techniques on Porcine tissue models
- Learn to set up a unit as well as team
- Special hands-on module on Upper GI Flexible Endoscopy
- Plenty of opportunity for informal interaction with nationally renowned faculty
- Opportunity to work on various Bariatric modules on the latest computerized simulator
