Master Course in Proctology focused on Benign Anorectal Pathologies

Course Date
17th Mar - 19th Mar

Course Outline

Benign ano-rectal conditions have a major share in a General Surgeon's practice but at the same time could be frustrating due to recurrences. No doubt therefore that there are multiple modalities of treatment for a single condition. New techniques are developing in this field and it may be difficult for a practicing surgeon to keep up with the same. This course aims to revisit the standard techniques and provide an update with newer modalities of treatment. The hall mark of this course would be virtual hands-on training on models with experts as faculty.
